

December 22, 2010

Mr. Ayres,

Throughout the course of construction, many details were subjected to the usual prayer of last minute changes. During this project, it was obvious that SMJ Construction was conscientious regarding the quality of workmanship and the safety of their employees and sub contractors. Adherence to the construction schedule was always the main topic. I feel Sean Pope displayed a high level of patience, professionalism and skill to put this project on course where it needed to be. The college has a building it can be very proud of. We have received positive reviews on how much everyone loves the results. My wishes are that there will be many good times to come in the CSC building. Thank you from the bottom of my heart!

Carl Peckitt
Director of Facilities Management
