RE: Limerick Elementary School Project

Dear Stan:

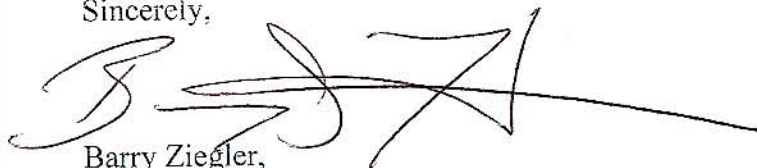

This letter is in appreciation for the outstanding performance of your firm on the Limerick Elementary School Renovation Project.

As you were aware, this project was multi-phased with very stringent completion dates. Your firm's ability to complete the project, on time and in most instances early was greatly appreciated. This made it much easier for the school district to function during our construction. Any issues that arose were handled in a professional manner and were amicable to both the contractor and the owner.

Again, the early completion of this project has been greatly appreciated, as well as being under budget, which is not much seen in school district projects.

I wish SMJ Inc. the best in any future endeavors it takes on as I know they are more than capable of handling it. If I can be of any future assistance in anyway, please do not hesitate to contact me.

Sincerely,

Barry Ziegler,
Supervisor of Operations and Facilities
